UPDATE ANNOUNCEMENT

The Year in Cardiology

STATE OF THE ART AND
FUTURE DIRECTIONS

Dubai
22-24 February
2019

INTRODUCTION

The Year in Cardiology congress aims at highlighting and summarising key topics in cardiology of the year 2018. The Congress will provide a broad overview of the novelties published or presented at major international meeting and of the guidelines released in 2018 by the principal scientific societies. The congress is intended to provide the practicing physician with the most up-to-date information in the latest scientific guidelines and at the same time give a comprehensive update of novel insights relevant both to the prevention and treatment of cardiovascular diseases.

The meeting will be organised by topics and each session will include one lecture on the relevant guidelines and one on the most important findings released in the year that had just passed.

The Year in Cardiology Dubai 22-24 February 2019

22 February, 2019

20:30

The Year in Cardiology 2018
