About TMA

The Translational Medicine Academy (TMA) is an international academic Foundation with focused activities in Mission Critical Areas of high public health importance having significant professional and patient therapeutic and educational gaps.

This event is registered with MedTech Europe and declared (provisionally) compliant: <https://www.ethicalmedtech.eu/>

Why a Heart Failure Guidelines Forum?

The objective is to better understand the existing Heart Failure guidelines development process and its implications in clinical practice. It is not to develop new guidelines, but to gather a multidisciplinary panel of leading international experts to discuss the latest evidence, ongoing research and controversial issues that have implications for the development of clinical practice guidelines.

Educational objectives

At the end of the meeting, all participants will have a better understanding of the unmet needs and knowledge gaps that need to be addressed by future research and development efforts, and of the most appropriate ways of progressing to conciliate and take advantage of clinical, societal, evidence-based medicine and regulatory requirements.

Tuesday 15th October 2019

08:45–09:30: **Session 8** – Acute heart failure

- Procalcitonin in AHF to guide therapy
- Diuretics

09:30 -10:30: **Session 9** - Supportive approaches to enable life-saving therapies
