THE FIRST GLOBAL WEB-CONFERENCE ON

THE CARDIO-RENAL-METABOLIC SYNDROME

FREE REGISTRATION FOR THE LIVE

Replays on-demand: 95 USD

Educational objectives

- Describe the complex pathophysiological interplay between cardiovascular disease, heart failure, diabetes and kidney disease.
- Recognise the need for a multidisciplinary team approach in the management of patients with patients with cardiac, renal and metabolic comorbidities.
- Analyse the results of recent landmark clinical trials and their implications in clinical practice.
- Review novel pharmacological treatments and medical devices.
- Implement treatment algorithms.
