

IRON DEFICIENCY BEYOND ANEMIA IN CARDIORENAL PATIENTS – INTERDISCIPLINARY CROSSTALK

January 24, 2021, 5:45 pm – 6:45 pm CET

Chairs: **Stefan D. Anker**, *Berlin, Germany* / **Iain C. Macdougall**, *London, UK*

▷ **Welcome and introduction**

Stefan D. Anker, *Berlin, Germany*

▷ **The cardiorenal syndrome – protecting the heart and the kidneys**

Claudio Ronco, *Vicenza, Italy*

▷ **Iron deficiency in kidney and heart disease – why iron matters beyond anemia**

Iain C. Macdougall, *London, UK* / **Peter van der Meer**, *Groningen, The Netherlands*

▷ **Practical management of iron deficiency in cardiorenal patients**

Piotr Ponikowski, *Wroclaw, Poland* / **Jay B. Wish**, *Indianapolis, IN, USA*

▷ **Interactive panel discussion**

All faculty

▷ **Conclusion**

Iain C. Macdougall, *London, UK*

EDUCATIONAL OBJECTIVES

- Describe the spectrum of chronic and acute disorders encompassed in the concept of ‘cardiorenal syndrome’
- Recognise the importance of integrated care of comorbidities in the management of patients with kidney and heart disease
- Discuss the essential role of iron in biology and the contribution of iron homeostasis imbalances to disease
- Evaluate the safety and clinical benefits of iron therapy in patients with kidney and heart disease
- Illustrate with case examples the practical issues related to the diagnosis, evaluation and treatment of iron deficiency in cardiorenal patients
